

# Next-Generation Messaging & Collaboration For Your Organisation

Zimbra Collaboration Suite (ZCS) solves the challenges facing today's organisation. ZCS provides an innovative experience designed to manage large inboxes, works with all desktops and devices, significantly reduces administration complexity, and is an open technology platform which easily integrates your mission critical services.

Agileware is a Zimbra Premium Partner and can provide you with consulting, integration, and installation support of Zimbra for deployment on-site or as a managed hosted service. Agileware can also deliver both on site and remote support for your business.

[Zimbra Starter Edition](#) is specifically for small businesses requiring less than 15 mailboxes that wish to deploy Zimbra. You get 15 Professional licensed mailboxes with native synchronization to Outlook and the Apple desktop, back-up/restore and more!  
<http://agileware.net/product/zimbra-starter-edition>

[Zimbra Standard Edition](#) is the option to choose for small to large businesses requiring per mailbox backup, Zimbra support, enhanced search and more. Standard Edition does not include native synchronisation with Microsoft Outlook or Apple iSync.  
<http://agileware.net/product/zimbra-standard-edition>

[Zimbra Professional Edition](#) is required if you wish to have native synchronisation with Microsoft Outlook or Apple iSync. Or to use Microsoft Outlook as the desktop email client. Professional Edition includes all the features of Standard Edition.  
<http://agileware.net/product/zimbra-professional-edition>

[Zimbra Mobile](#) enables two-way, over-the-air synchronization (OTA) of mail, contacts, calendar and task data between the mobile device and the Zimbra Server. It features push email, which sends messages in real time to your device when it arrives on the Zimbra Server.

## Testimonials

Teys is the largest Australian-owned and second-largest beef processing company in Australia, processing one million cattle and turning over more than \$AUD1.2B per annum. Teys comprises four modern beef processing facilities, a 30,000-head feedlot, a tannery, wholesaling divisions, and a value-added facility.

- When you do a cost per cost comparison with Exchange its a no brainer.
- We support 500 accounts with 1 hour per month of Zimbra systems administration and negligible end user support.
- Zimbra upgrades are a simple exercise and so far have been a very reliable procedure.
- Zimbra provides integration with our existing environment and to choose our own software, whereas the Microsoft Exchange solution dictates what we must use from desktop to server.
- Zimbra supports our office and mobile workers requiring very little training and support.

### How to request 60 day free trial of Zimbra

Zimbra is available to you as a free 60 day trial. During your trial, you have the added benefit of support from both Agileware and the Zimbra team. This trial includes Zimbra Mobile and Zimbra Professional Edition and is a perfect no-risk option if you want to evaluate, load-test or even start migrating users in your organisation. After the 60 period expires Zimbra will continue to function, however Zimbra Mobile and those features provided by Zimbra Professional Edition will cease to function. Please [contact us](#) for your Zimbra 60 day trial license key.

### Licensing

Zimbra is licensed on a per mailbox basis in orders of 25 mailboxes. The license is an annual subscription, with renewal costs the same as the initial subscription.

### Perpetual license for Zimbra

Instead of renewing your Zimbra license annually, you can choose to purchase a perpetual license for Zimbra. This includes 1 year of support and updates for the first year. You may purchase support (including updates) for no more than 20% for every year thereafter.

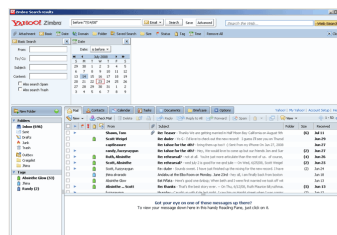

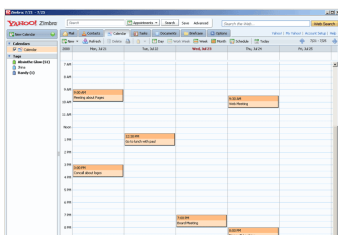

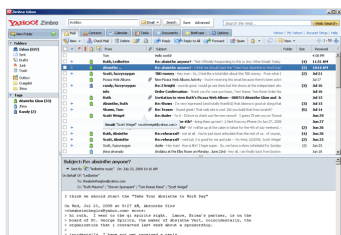

### Pricing

Competitive pricing on all Zimbra products is available on the [Agileware website](http://agileware.net/howtobuy/zimbra) <http://agileware.net/howtobuy/zimbra>

# Zimbra Collaboration Suite (ZCS) Features

ZCS is a complete messaging and collaboration Server with an AJAX Web Client. It features Email, Contacts, Calendar, Documents, Instant Messaging, Tasks, plus synchronization to other desktops and devices.

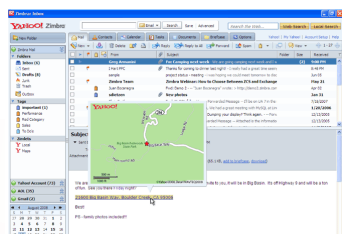

## Web Client

- AJAX Admin Console and full Command Line Interface (CLI) to manage ZCS
- Migration wizards for Exchange, Domino, GroupWise, plus standard IMAP migration
- Real time mailbox backup and restore
- Native hierarchical storage management (HSM) and high-availability (HA) / clustering
- Cross mailbox search and discovery with full archiving for regulatory compliance
- Integrated Anti-Spam, Anti-Virus, and Directory Services
- Open web service APIs / REST interfaces
- Fully supports multi-tenancy and delegated administration for hosting and service providers

## Administration

- Rich browser based AJAX interface with application-like features such as drag and drop
- Powerful tagging and conversation views to manage multi-gigabyte inboxes
- Comprehensive sub-second search, including within over 200 attachment types, plus saved search folders
- Share and collaborate on any application- inboxes, contacts, calendars, document, and tasks
- Enterprise calendars with global free-busy, including ZCS to Exchange 2003 server
- Author documents online including images, tables and spreadsheets
- Instant Messaging with buddy lists, multiple conversations and archiving
- Zimlets 'mash up' third party applications such as maps, CRM, inventory and package tracking in the Zimbra Web Clients
- Standard HTML web client interface for accessibility and legacy browser support

## Operating Systems Available

Zimbra Server is available for many popular operating systems: Red Hat Enterprise, Fedora, Ubuntu, Debian, Mandriva, and SUSE Linux plus Mac OS X, rPath (Software appliance ISO image), and VMware (certified virtual appliance).

## Zimbra Desktop

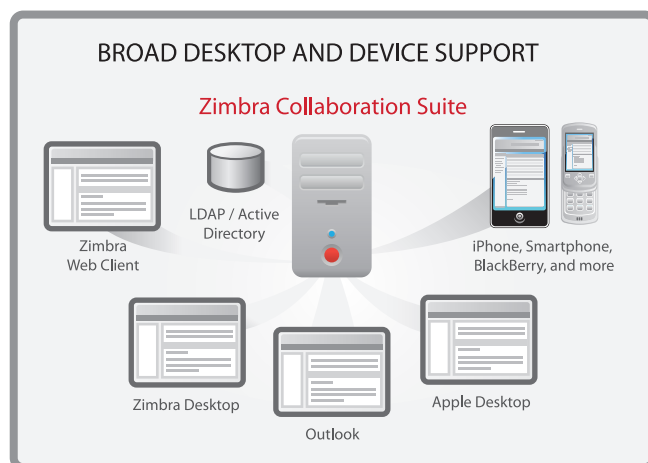

- Zimbra Desktop enables offline access to the Zimbra web experience and aggregates other POP / IMAP accounts on Mac, PC, and Linux desktops (ZCS server not required)

## Other Desktops

- Native MAPI synchronization to Outlook 2003 / 2007 with full delegate and offline access
- Native synchronization to Apple desktop applications via Zimbra iSync Connector, plus CalDAV support
- Support for all POP3 / IMAP4 Clients

## Mobile

- Native synchronization to BlackBerry handsets via Zimbra Connector for BlackBerry Enterprise Server (BES)
- Native "over-the-air" synchronization to Windows 5+, Palm, and Symbian OS Smartphones
- Over-the-air synchronization on popular J2ME devices like the Motorola RAZR 2
- Access Zimbra email, contacts, calendar on any device with an HTML capable mobile web browser
